## MISSION

dynaMinds shall Touch, Move and Inspire every person it interacts with

## VALUES

Trust, Transparency, Completeness, Speed

# What is a Psychometric Assessment

Psychometric Assessment is a Scientific Analysis of an attribute of a human being.

Depending on the need, by administering a battery of Psychometric Assessments, we can exactly identify what are one's **natural likes and dislikes**, **how is the person expected to behave in a given situation**, **what competencies currently exist in the individual**, **how the person is likely to view others**, **what values the person upholds**, and many such attributes.

The purpose of Psychometric Assessment is **not to judge**, but **to understand** the individual.
